Boomerang Refresh

To finish this week, we are delivering new developments.

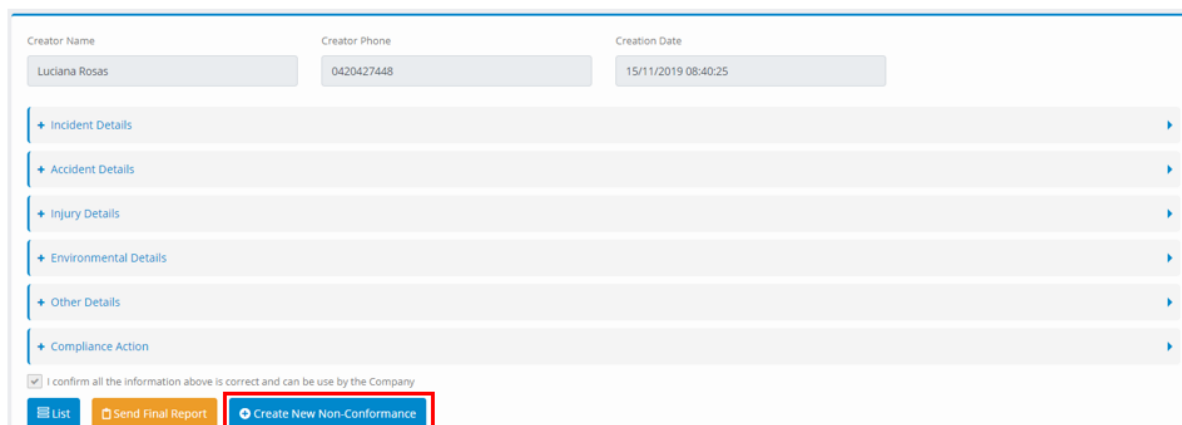

Updates

1. Non-Conformance Report:

Finally the NCR is ready to be used by the compliance team.

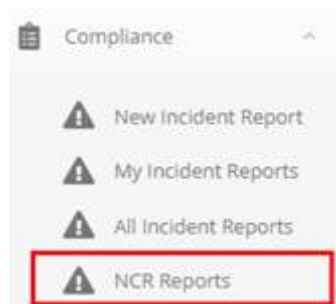

It was done with a good team work between IT, Compliance and Accounts and soon we will send to everybody the NCR training.

Only the Compliance team will be able to open an NCR directed through the incident report.

The screenshot shows a form for creating a Non-Conformance Report (NCR). At the top, there are three input fields: 'Creator Name' (Luciana Rosas), 'Creator Phone' (0420427448), and 'Creation Date' (15/11/2019 08:40:25). Below these are several expandable sections: '+ Incident Details', '+ Accident Details', '+ Injury Details', '+ Environmental Details', '+ Other Details', and '+ Compliance Action'. At the bottom, there is a checkbox labeled 'I confirm all the information above is correct and can be used by the Company'. Below the checkbox are three buttons: 'List', 'Send Final Report', and 'Create New Non-Conformance'. The 'Create New Non-Conformance' button is highlighted with a red rectangle.

After the creation, will be possible to view all the NCRs in NCR Reports, as showed below, and it will be send automatically to the selected responsible.

When the responsible executes all the required actions in the report, he will be able to complete the NCR, pressing the button

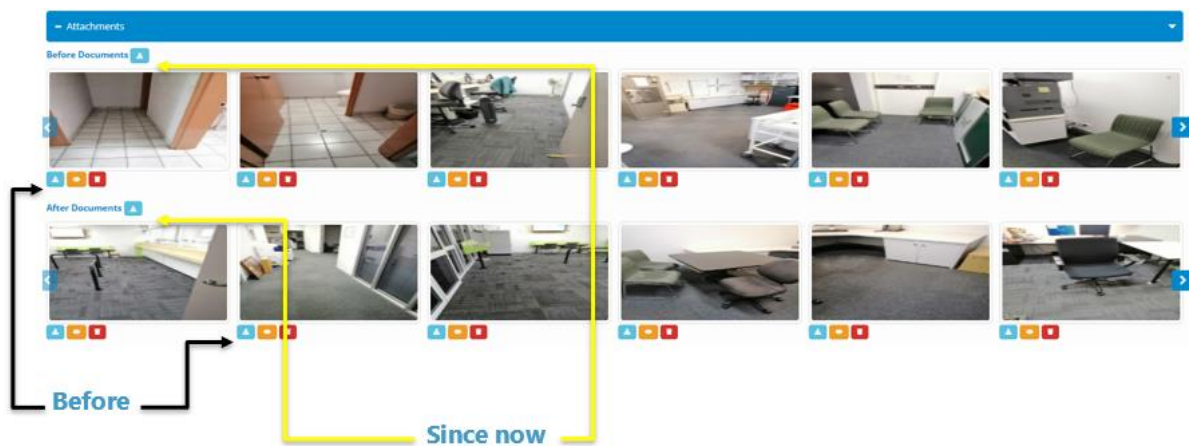

Close Non-Conformance

and it will be automatically send to the Compliance manager do get the final requested actions.

Everybody will receive QCC – NCR training on next week!!

2. WO - Multiple download and compressed files:

As a result of a series of tickets, finally we developed a easier way to download all the before and after pictures from the Work Orders.
At the same time, the system will compress all the files, greatly reducing the size of all of them.

You will able to open the compressed list of files and see all of them before send to the client or, if you prefer, it will be possible to download one by one in the same way that we have today.

Next Steps

As we let everybody knows in our staff meeting, the IT team will be devoted in the further next weeks developing the access rules into Boomerang.

It will bring more security to everyone.
We will show you all the definition soon.

If you have any further question, don't hesitate to creating a new ticket in Boomerang for the Finance team.
